New Campus Development

Swansea University

Swansea University has witnessed a period on unprecedented growth, due to this they have run out of development space on the Singleton Park Campus and so are exploring the possibilities of expanding on to a new site within the local area. The site for the second campus has been identified as land owned by BP, who after 60 years in the region would like to leave a legacy. This has provided Swansea with the opportunity to enter into a development agreement with a developer to expand onto the new campus.

Client	Swansea University
Project Title	New Campus Development
Client Sector	Higher Education
Service Provided	Project Manager

Our Role

Provelio have been commissioned by the University to support the Estates Department in establishing their requirements for academic facilities at the Bay Campus. This includes initial briefing meetings with heads of school to understand the type and functionality of space that will be required.

The next stage will be to produce detailed briefs, which will enable better estimates of programme, costs and risk profile to be established.

Client Benefits

- Specialist support to the Estates Department
- Good quality initial briefs produced based upon extensive Higher Education experience.
