

Building Space Analysis

Provelio can provide space analysis and space efficiency services for any type of built asset using in-house architectural and building surveying staff. Provelio have the experience of carrying out space analysis commissions for a number of clients and can provide accurate, clear information regarding the condition, usage and utilisation of the client's assets.

Client	Various
Project Title	Building Space Analysis
Client Sector	Various
Service Provided	Analysis of Existing Property Utilisation

Our Role

The critical issue regarding the cost of building and maintaining a facility is the amount of space and the efficiency of its use. Provelio have extensive experience of carrying out space analysis commissions for individual buildings or entire client estates. The production of detailed space utilisation drawings and space analysis reports are vital to establishing the real need for development and identifying further options that can be rigorously assessed before implementation. The outcome of such a commission would highlight and make recommendations to the Client for the need of new assets, the refurbishment of current assets or better internal layouts and usage to improve the efficiency and utilisation of the asset. Provelio can provide any further analysis or propose any ongoing services that may be required to improve the client's built assets such as:

- Organisational Reviews
- Facilities Management advice, coordination and review of existing providers
- Project Management
- Procurement Advice and Management
- Ongoing support and project monitoring services

Client Benefits

Provelio have the experience and in-house staff with relevant skills to carry out high-quality space analysis commissions for any size of client asset or estate. The benefits of a Provelio Space Analysis commission would be (but not limited to):

- Better understanding of the client's assets
- Detailed analysis of the client's assets
- How each asset is being used and how efficiently
- Recommendations for improvements, either in terms of increased efficiency or a list of recommended works
- Detailed information that will aid any future detailed design work

Ultimately a Provelio space analysis will help provide a more efficient business for our clients.
